

**Two Years Advanced Diploma Course in Fish Breeding
(Hatchery Production Worker)
University Grants Commission's Community College Scheme
Madhab Choudhury College, Barpeta, Assam**

Summary Report

Session-2022-23

On receiving the continuation grant from UGC, the advertisement leaflets for admission were circulated using local news dailies as well as in the form of printed flexs at various places including the college campus. The minimum qualification was kept HS passed from any stream (Science, Arts, Commerce). On receiving a sufficient number of applications, the admission process was initiated for the concerned course. A total of 13 applications were received for the courses and all students were selected for each programme based on the HS results of the students. The classes started soon after the completion of the admission process. The course was designed to accommodate a 40 hours class as per the guidelines of NSDC. During the course of studies, the students had to perform various academic activities such as field visit (Fish Diversity and Heritage Museum, Barania, Baksa), submission of assignments (preparation of Aquarium models) and hands-on experience of the course content. The practicals were performed in both laboratory and field for better understanding of the courses. There was a dropout student, who could not continue the course. During the final (fourth) semester only five students appeared for the examination. All the semester examinations were conducted efficiently in the due time and results were declared.
