

**Certificate Course in Organic Farming/Bee Keeping
University Grant's Commission's Community College Scheme
Madhab Choudhury College, Barpeta, Assam**

Summary Report

Session-2022-23

The application procedure for the relevant certificate courses was started when the UGC funding was received. Applications from Assamese high school graduates were first requested, with a focus on the Barpeta district. To ensure openness, the admissions announcement was printed in English daily. Thirty applications were submitted for the two courses combined, and fifteen students were chosen for each program according to their preferences. Fifteen days following the conclusion of the admissions process, courses began. The course was designed to accommodate a 30 hours class as per the guidelines of NSDC. In order to get practical experience with the course material, students were required to participate in a variety of academic activities during their studies, including field trips to organic agriculture areas and visits to nearby beekeepers. To help students better grasp the courses, the practicals were conducted in both laboratory and field settings. The final exams were completed effectively and on schedule, and the successful students received their certificates.
